

Assess the health and wellbeing of your school with the **Pupil Perceptions** survey

Brought to you by
Enfield
Virtual School

Pupil Perceptions Survey

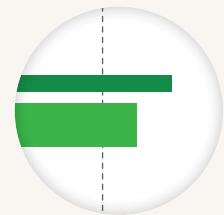

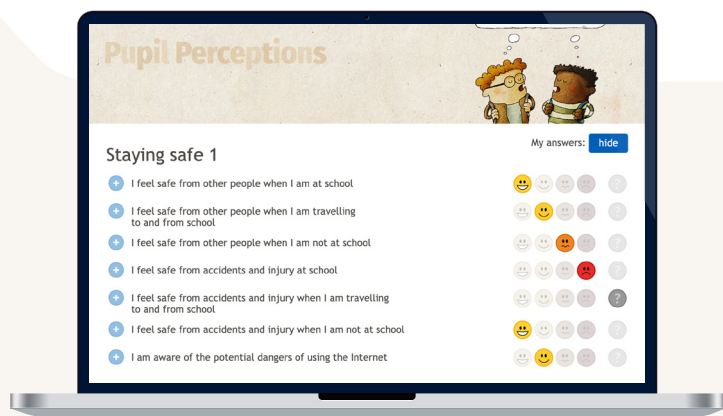

Take advantage of this **fully-funded** survey brought to you by your Virtual School. *Pupil Perceptions* can identify the specific concerns, emotional health and wellbeing of your pupils.

Supporting learning and wellbeing post-pandemic

As a participating school, you would receive in-depth reports and analysis about the wellbeing and 'readiness for learning' of all your pupils broken down by **year group**, **gender**, **ethnicity**, **religion** and **mode of transport** to really be able to detect patterns and offer very specific support whether in terms of individual/group support or curriculum modifications to address issues that arise through the survey.

Pupil voice data could inform your school's approach to keeping children safe in education

Running the *Pupil Perceptions* survey will help us as a Virtual School look after children in care as well as offer support to children with a social worker without singling them out from schools.

See where your school sits in relation to national averages.
